

SHRUB ROSE PLANT NAMED 'BAICKER'

Abstract of the Disclosure

A new and distinct variety of landscape shrub rose plant is provided which forms on a recurrent basis in clusters attractive single rich red blossoms suffused with rosy pink having a near white to yellow eye. The plant exhibits a compact, upright and bushy growth habit, glossy medium green foliage, and excellent tolerance to Black Spot and Powdery Mildew. The attractive medium green glossy foliage contrasts nicely with the red blossom coloration. A tough rose plant of good hardiness is provided. The plant can be grown to advantage as a specimen, border planting, or as a mass planting.
